TRI Manages and Provides Multi-Media, Logistical, and Communications Services to the National Library of Medicine (NLM) Informatics Training Conference

Bethesda, Maryland – July 2008, TRI manages and provides multi-media, logistical, and communications services to the National Library of Medicine (NLM) Informatics Training Conference held at the Natcher Conference Center on the National Institutes of Health (NIH) campus. The NLM supports research training in biomedical informatics at twenty educational institutions throughout the United States. These programs offer graduate education and postdoctoral research experiences in a wide range of areas including: health care informatics, bioinformatics and computational biology, clinical research translational informatics, and public health informatics. Many programs also offer additional tracks in areas such as imaging, dental, and library informatics. Each year, the NLM convenes an Informatics Training Conference to bring the participants in the informatics program together to showcase their work, to evaluate the full scope of current work in the field, and to meet their peers. All trainees on full-time NLM appointments at the twenty institutionally-based programs as of the date of the conference, including trainees in the NLM-RWJF public health informatics initiative, are expected to attend this meeting. The two day meeting includes multiple concurrent sessions, plenary sessions and an offsite event.

Participants in the NLM Informatics Training Conference for 2008 gather at the NIH Campus.

About TRI: Technical Resources International, Inc. is a certified minority-owned full-service contract research and communications organization. We offer health and communications services to government agencies, the private sector, and non-profit organizations.
