

## **TRI Manages and Provides Technical, Logistical, and Communications Support to the USTDA Orientation Visit on Renewable Energy for the Jordanian Delegation**

*Bethesda, Maryland ( November 30 – December 11, 2009):* TRI manages and provides technical, logistical, and communications support to the U.S. Trade Development Agency's (USTDA's) Orientation Visit on Renewable Energy for the Jordanian Delegation. USTDA has funded a visit to San Jose, Bakersfield, and Pasadena in California and to Las Vegas in Nevada for key Jordanian government officials and business executives from leading Jordanian renewable energy firms. Their goal is to identify and establish business relationships with U.S. developers and manufacturers of solar, wind, and geothermal technology interested in gaining a foothold in this burgeoning sector of the Jordanian economy.

As tariffs on U.S. manufactured goods fall as a result of the U.S. - Jordan Free Trade Agreement, there are increasing opportunities for U.S. companies' participation in the Jordan renewable energy sector. Accordingly, the USTDA orientation visit provides U.S. businesses operating in the sector with unprecedented access to these key-decision makers to discuss current U.S. technologies, advances in equipment, best practices, and expand on what services or products their firms can provide to support the Jordanians' energy needs in solar, wind, and geothermal power generation.
