TRI Accredited in Medidata Rave Targeted Source Data Verification (TSDV)

Bethesda (4/14/2023): TRI is pleased to announce our organization is accredited in Medidata Rave Targeted Source Data Verification (TSDV). This accreditation enables TRI to implement Source Data Verification services via Medidata Rave.

Rave TSDV accreditation as a Medidata Partner requires training on the Medidata Rave TSDV application, process, optimization, and scope of TSDV services to help sponsors streamline clinical monitoring processes. TSDV enables research teams to quickly identify issues and prevent them from recurring, improving data quality, increasing site enrollment, and reducing data cycle times and costs. Rave TSDV accreditation is also dependent on completion of Medidata Rave Electronic Data Capture (EDC) accreditation, which TRI has accomplished, along with Rave Coder accreditation.

TRI's Medidata Rave partnerships and accreditations demonstrate our continued commitment to invest in technology to optimize clinical trial practices. TRI provides our clients the highest value by providing the subject matter expertise and refined processes that improve new drug, vaccine, and medical device development.

About TRI: Technical Resources International, Inc. (TRI) is a full-service Contract Research Organization plus (CRO+). TRI areas of expertise include clinical trials management, regulatory affairs, medical writing, safety and pharmacovigilance, data management and biostatistics, quality assurance, information technology, and communications. TRI provides support to government agencies, the private sector, and nonprofit organizations. Further information is available at www.tech-res.com
